

## SERVANT CLASS: ASSASSIN

*Class Assassin, Silent Killer and Heroic Spirit of Assassinations, is one of the seven normal Servant classes summoned for the Holy Grail War and is one of the Four Cavalry Classes; Servants of this class are skilled at operating covertly, stealthy, and silently. This class is one of the weaker classes at fighting, as most its members possess low attributes due to not having glorious legends as heroes, so it instead specializes in killing Masters rather than Servants. It is an oddity compared to the more formal knight classes who believe in fair duels and chivalry in combat; they will attack using the most unfair and favorable conditions, and with these conditions, it is possible for an Assassin to match and defeat other Servants. The Assassins' special class ability is **Presence Concealment**, which allows them to remain undetected when spying or preparing to ambush their targets.*

### KEY ABILITY

Any.

At 1st level, your class gives you an attribute boost to an ability of your choice.

### HIT POINTS

8 plus your Constitution Modifier.

You increase your maximum number of HP by this number at 1st level and every level thereafter.

### INITIAL PROFICIENCIES

At 1st level, you gain the listed proficiency ranks in the following statistics. You are untrained in anything not listed unless you gain a better proficiency rank in some other way.

#### PERCEPTION

Expert in perception

#### SAVING THROWS

Trained in Fortitude

Increase your proficiency rank in Reflex by one level

Expert in Will

#### SKILLS

Increase your proficiency rank in Stealth by one level

Trained in a number of additional skills equal to 6 plus your Intelligence modifier

#### ATTACKS

Expert in all weapons

#### DEFENSES

Trained in all armor

## SERVANT PROFICIENCY

As a servant, your initial proficiencies function in a different manner compared to standard classes.

Whenever your proficiency rank in **Attacks** and **Defenses** would normally increase to match your current rank, increase it by one additional rank instead (for example: if you are a fighter with a master proficiency in melee weapons at level 1, once your fighter class grants you master proficiency in weapons, your proficiency would then increase to legendary). This is capped at one rank above legendary, which is termed 'mythical,' resulting in an additional +2 on top.

## SPIRITUAL BODY

Servants are made of **Ether** one of **Five Great Elements**, on it's own it is amorphous and is incapable of materializing by its own power, with the power of the grail, the servants are able to gain a material form with a **Spiritual Core** serving as "their center, their heart, their CPU" that dictates their every function. While a servant may bleed and take damage to their organs, their true being resides in a Spiritual Core.

Servants are beings able to **switch** between a **Spiritual Body** and **Material Body** at will, although at a rate no faster than **once per minute**. While in spiritual form, they cannot be easily detected by enemies due to being **invisible** to the naked eye and most forms of scrying, or be affected by physical interference. They can travel where they please without being impeded by walls, but they also **cannot carry anything** in that state. Their senses are limited to spiritual sensations (*a sort of vague sense imagine being in the ethereal plane but without your normal senses*), so they must materialize in order to fully experience normal senses when sharing a visual link with their Master. Their upkeep cost is low when not materialized, so many Masters prefer them to stay in spirit form when they are not fighting or doing other tasks that require them to be in physical form to lower the cost on themselves.

Other servants can easily sense and interact with a servant in spirit form, while a magus may find it difficult to do so.

*While in spirit form, your speed doubles, but you incur a -4 status penalty to AC (Armor Class), Perception and reflex saves, you are also flat-footed. Additionally, you are unable to make attacks or cast spells.*

## DYING AND UNCONSCIOUS CONDITIONS

As a servant, you do not fall unconscious when reduced to 0 hit points. Instead, you maintain consciousness but incur a **penalty** equal to **twice** your **dying value** on all rolls (such as damage rolls, saves, and checks).

Note that it is still possible to acquire the **unconscious condition** through other means.

Additionally, effects with the **death trait** that reduce your hit points to 0 only increase your dying value by 3, instead of causing immediate death.

## CLASS FEATURES

You gain these abilities as an Assassin. Abilities gained at higher levels list the level at which you gain them next to the features' names.

### SWIFT SNEAK

With your exceptional stealth, you can move at full speed while remaining unnoticed. This ability extends to any form of movement you are proficient in, such as burrowing, climbing, flying, or swimming, allowing you to sneak skillfully across various terrains.

### SWIFT SNEAK

You can move your full Speed when you Sneak. You can use Swift Sneak while Burrowing, Climbing, Flying, or Swimming instead of Striding if you have the corresponding movement type

### SNEAK ATTACK

When your enemy can't properly defend itself, you take advantage to deal extra damage.

### SNEAK ATTACK

If you Strike a creature that has the off-guard condition with an agile or finesse melee weapon, an agile or finesse unarmed attack, a ranged weapon attack, or a ranged unarmed attack, you deal an extra 1d6 precision damage. For a ranged attack with a thrown melee weapon, that weapon must also be agile or finesse.

Increase the number of dice by one at 5th, 11th, and 17th levels.

If you already had the Sneak Attack feature or gain it from another source, increase the damage dice by one step (d6 to d8 etc)

### SURPRISE ATTACK

You spring into combat faster than foes can react.

### SURPRISE ATTACK

On the first round of combat, if you roll Deception or Stealth for initiative, creatures that haven't acted are off-guard to you.

If you already have Surprise Attack or it from another source, Surprise Attack will affect every round of combat instead of just the first.

### PRESENCE CONCEALMENT

### PRESENCE CONCEALMENT

Presence Concealment is the capacity to hide one's presence as a Servant. It is the Class Skill of the Assassin class.

- **D Rank:** You can hide even in **lesser cover** and receive a **+2 bonus** to Stealth checks.
- **C Rank: Conceal** - As a single action **✦**, you hide yourself from the senses of all other creatures. Roll **Stealth** once to determine if you are undetected; other creatures can **only detect you** if your roll results in a **critical failure** against their Perception DC, or if they achieve a **critical success** against your Stealth DC. This effect **ends** if you make an **attack or perform an action that draws attention**. Conceal cannot be activated again for **1 minute** after it ends. Any bonuses that affect **hiding, sneaking, or avoiding notice** also apply to Conceal.

- **B Rank:** If you would roll **less than a 10** on the d20 for a Stealth check, **treat the result as a 10**. If you attack while **Conceal** is active, you gain a **+5 bonus to your attack roll**. Additionally, you gain the **Foil Senses** feat.
- **A Rank:** When using **Conceal**, you become **unnoticed** on top of undetected. When a **creature detects** you for the first time, you are **only considered hidden** rather than observed.
- **EX Rank:** You become one with the environment itself, achieving a level of concealment beyond ordinary capabilities. **You remain hidden to all creatures\*** at all times, unless you choose otherwise. When **Conceal would end**, it **reactivates** automatically **at the beginning of your next turn**. The bonus to your attack rolls while Conceal is active **increases to +10**.

## NOBLE PHANTASMS

Noble phantasms are powerful armaments made using human imagination as their core, and are the weapons and/or abilities owned by Heroic Spirits. As humanity's illusions, they embody the ultimate Mysteries of a hero as symbols of their existence through historical fact and anecdotes.

They can be physical weaponry (e.g. swords, spears, bows) or support items (e.g. shields, rings, crowns). They can also be abstractions such as unique, often magical abilities (even close to or matching True Magic), unique (even conceptual) means of attack, curses, and changes to the very environment and its physical properties. When summoned as Servants in the Holy Grail War, they are the trump cards of the heroes that allow them to overcome others in battle.

A servant may possess more than one Noble Phantasm; however, the more they have, the weaker each tends to be compared to possessing a single Noble Phantasm. Noble Phantasms also follow the skill ranking system (D | C | B | A | EX), with higher-ranked Noble Phantasms being more powerful.

Noble Phantasms are classified by their effectiveness against enemies. One Noble Phantasm may have multiple classifications depending on its abilities. The classification and properties of the Noble Phantasm dictate both the number of times it can be used and the duration required for the NP to 'recharge'.

- **Anti-Unit-** Anti-Unit Noble Phantasms are those specialized against defeating other people in single combat. Compared to stronger weapons, a majority of Anti-Unit Noble Phantasms will not go beyond defeating other beings.
- **Anti-Army** - Anti-Army Noble Phantasms are those with a wide enough range to be specialized against armies. They are more powerful weapons than Anti-Unit Noble Phantasms, capable of

- **Anti-Fortress** - This rank has powerful Noble Phantasms that can even blow away solid fortified structures. While the difference between Anti-Unit and Anti-Army is the variation in area of effect, Anti-Fortress Noble Phantasms are distinguished from other categories by the great difference in power.
- **Barrier** - The classification of Noble Phantasms used to create barriers, typically Bounded Fields, but it does not include those that are also used to attack.

There are numerous additional classifications for Noble Phantasms, including but not limited to Anti-Self, Anti-Country, and Anti-Purge.

## CLASS SKILLS AND PERSONAL SKILLS

Skills are the embodiment of a Servant's various abilities and characteristics, (Riding skill, Presence Concealment etc). They are divided into two main categories: **Class Skills**, which are typically connected to the Servant's Class, and **Personal Skills**, which reflect abilities or anecdotes connected to the life and legend of the Servant themselves, Personal Skills typically outweigh Class Skills in impact.

Again, a servant may possess numerous Class and Personal Skills; however, they tend to be stronger when their number is fewer.

## PROGRESSION

- **Class Skills:** From level 1, you have access to all your Class Skills, but they all start at their lowest rank, D. To progress a particular skill, you must retake the corresponding feat, which will increase its rank by one degree. This approach provides an incredible amount of versatility in your choice of Class Skills. All servant classes begin with two Class Skills at level 1 and acquire additional skills as they level up.
- **Personal Skills:** Similar to Class Skills, Personal Skills start at rank D and progress in the same manner, requiring the retaking of the same Personal Skills. The key difference is that Personal Skills progress at a much slower rate, starting at level 3 and advancing every 3 levels (as indicated by the '+++' symbol in the advancement table on page 2). Additionally, Personal Skills are not provided by the class and must be created in collaboration with your Dungeon Master."
- **Noble phantasms:** Noble Phantasms follow the same progression rules as Personal Skills, with the difference being that they advance at an even slower rate, starting at level 3 and increasing at level 7, 10, 15 and 20. This progression allows for a maximum of six advancements in a Noble Phantasm.

The classification of a Noble Phantasm also plays a significant role. It is highly unlikely for a servant to possess more than one Anti-Army or Anti-Fortress NP, whereas an Anti-Unit NP is subject to fewer restrictions.

## A RANK

Your skills can only get to A Rank after reaching **level 10**. If your class provides you with a class skill advancement that would increase your rank to A before level 10, you may **substitute** that advancement with an **Assassin feat** appropriate for your level.

## EX RANK

It is impossible to reach an EX rank simply by retaking a Class or Personal Skill from A rank. The only way to attain EX rank is through an **in-game secret**, which you may or may not discover. (To clarify, uncovering the secret will increase your rank by one and unlock the potential to reach EX rank, but it will not grant EX rank immediately, unless you are already at A rank in that specific skill).

### EVASION

### 7TH

You've learned to move quickly to avoid explosions, dragons' breath, and worse. When you roll a success on a Reflex save, you get a critical success instead.

### CAVALRY WEAPON SPECIALIZATION 7TH

You've learned how to inflict greater injuries with the weapons you know best. You deal 2 additional damage with weapons and unarmed attacks in which you are an expert. This damage increases to 3 if you're a master, and to 4 if you're legendary.

## ASSASSIN CLASS FEATS

### INDEPENDENT ACTION

Independent Action is the ability to remain independent even when rejecting the Magical Energy supply from one's Master; the ability that allows for action even in the absence of the Master. Independent Action is the Class Skill of the Archer class.

At higher ranks, Servants can stay in this world longer without a contract, independently from the Master's Magical Energy. This allows Masters to focus on larger spells, or maintain the Servant even if they're unable to supply Magical Energy due to injury. However, these Servants are harder to control and retain, making Command Spells the only reliable method of commanding them.

### INDEPENDENT ACTION

- **C Rank:** It is possible for a Servant to stay in the world for **one day without a Master**.
- **B Rank:** It is possible for a Servant to stay in the world for **two days without a Master**. However, this is the ideal value achieved by maximally conserving mana and avoiding battle and NP usage.
- **A Rank:** It is possible to take action even without a Master. However, to use NPs of great magical energy consumption, backup from the Master is necessary. At Rank A, it is possible for a Servant to stay in the world for about **a week without a Master**.
- **EX Rank:** At EX rank, Independent Action allows for nearly any act, whether related to combat or otherwise, to be undertaken without support from the Master.

- **C Rank:** Creatures that try to hide from you get one level of success lower against you. Additionally, you can discern the type of creature (e.g., humanoid, beast, undead) when they attempt to hide within your 60ft. Enemies **must succeed at a Perception check against your Deception DC** to distinguish between you and the Doppelgänger. (should I leave the duration to just be sustained or is it fine this way?)
- **C Rank:** Your Doppelgänger becomes more than just a decoy, actively assisting you in combat. You can **switch places with the Doppelgänger** as a free action **✦** once per turn; this does not provoke reactions. - **A Rank:** Whenever a creature within your Aura of Despair would gain the frightened condition, you can choose to inflict the enfeebled, stupefied, or clumsy condition instead (of equal value). - **EX Rank:** Any frightened condition you inflict on a creature is doubled (e.g., frightened 1 becomes frightened 2 AND THEN IS DOUBLED to frightened 4).

You can now set up hazards that have a level up to 2 levels higher than your own.

- **B Rank:** You can set up to 2 hazards at a time. Setting up a hazard only takes 1 action. Your hazards become harder to discover and resist; increase all of the hazard's DCs, attack rolls, and saving throws by 2. Additionally, you can create traps that affect a larger area, doubling the normal radius of effect.
- **A Rank:** You can set up to 3 hazards at a time. Your traps become extremely resilient, requiring two successful disarm attempts to neutralize them.
- **EX Rank:** Setting up a hazard is now a free action, usable once per round. You can also fuse the effects of two hazards into one. When fusing two hazards, select two traps you can set; their effects are combined into a single hazard. The combined hazard retains the highest DC and attack bonus of the two original hazards and gains both of their effects. The level of the fused hazard is considered to be the higher of the two original hazards plus 1.

- **D Rank:** When you deal damage to a creature they take 1d4 persitant damage for each damage dice they took.
- **C Rank:** (leaving empty for now till I get feedback)
- **B Rank:** You've mastered the art of initial torment, knowing that the first strike of pain is most effective in shattering the resolve of your foes. When you apply a type of persistant damage to a creature for the first time they must make a fortitude save against your class DC or become slowed 1. Each time a new type of persistant damage is added increase this value by 1. The slowed condition is reduced by 1 each round, or when one type of persistant damage is recovered.
- **A Rank:** Each instance of persistent damage of the same type adds together, increasing the overall damage dealt each round.
- **EX Rank:** Half of the damage you deal becomes persistant damage. Once per day you can force all creatures affected by your persistant damage to become paralyzed for 1 round. This paralysis cannot be mitigated by resistances or immunities.
